## A Closed Car Letter From Archy

By Don Marquis

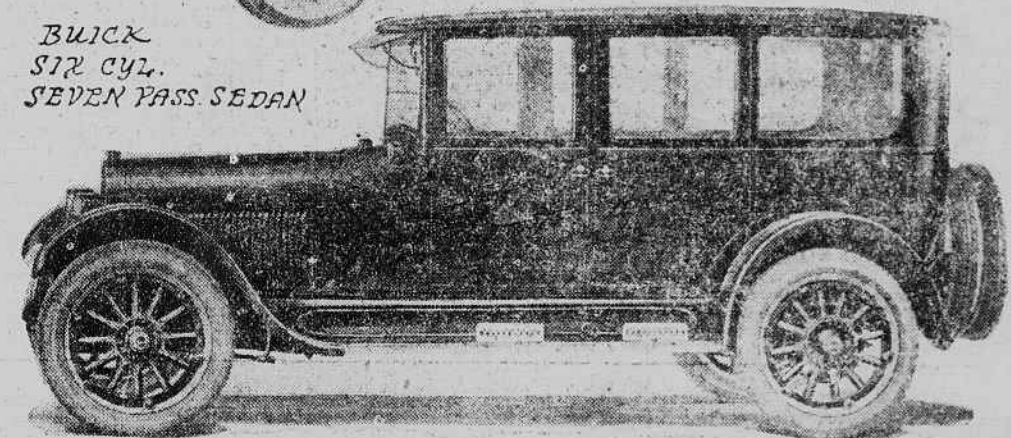

boss did it ever  
occur to you  
how far ahead of the human  
race insects are in some  
ways take the matter  
of automobiles  
for instance  
man wishes for wheels  
to help out his  
feeble methods of locomotion  
but most insects  
have no wheels at all  
yet they get there  
just the same  
they have wings  
given to them by  
mother nature herself  
man must think  
until his brains are tied  
into knots with the  
effort trying to invent  
various devices such as  
automobiles and aeroplanes  
to put him on to a level  
with the insects  
before we leave the subject  
boss i wonder  
if such a thing  
could be developed as  
an automobile for cockroaches  
the only ride i ever had  
on an automobile was  
too thrilling to be  
comfortable  
i crawled in under the hood  
to get a snack of some hot  
grease that smelled  
rather appetizing and just  
then the thing started up  
and the various whizz wheels  
and dood dads all began  
to whirr and leap and jump

and go round and round  
with such disconcerting  
velocity that i did not  
dare to try to crawl out again  
on every side i was surrounded  
by machinery  
and all of it was in motion  
and all of it seemed  
angry at me personally  
when it stopped i was  
a hundred miles off my beat  
and i had to beg a stamp  
and mail myself back  
to new york  
one thing i did however  
that i am not sorry for  
when the car stopped  
the owner was trying to sell  
it to a friend  
but when the prospective  
buyer saw me crawling out  
from among the works  
he said i will not buy  
a car that is full of  
cockroaches and insects  
i suppose there are spider  
webs on the inside of that  
machine too and more than  
likely if the spider webs are all  
that holds that car together  
i lost the sale for that man  
that abducted me ha ha  
i am not going to the  
automobile show for something  
tells me that if i crawled  
out of a machine i might  
be unwelcome  
hoping that you  
like myself are hitting  
on all six i am  
as ever your faithful  
little bug
